Recording data							order to get accurate data (closer to the true value).	
Links to maths- progression in measurement			Begin to use standard measures - rulers, weight and containers	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml) Measure using appropriate tools and units. Compare and use mixed units and simple equivalents. Scaling by integers.	Convert between different units of measure	Convert between different units of measure solve problems involving the calculation and conversion of units of measure, using decimal notation up to 3 decimal places where appropriate use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3 decimal places

Setting up simple tests	Plan and think ahead about how they will explore or play with objects.	Plan and think ahead about how they will explore or play with objects.	Performing simple tests Identifying and classifying 		Setting up simple practical enquiries, comparative and fair tests 		Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary 	
	Talk about what they see, using a wide vocabulary.	Make comments about what they have heard and ask questions to clarify their understanding.	The children use practical resources provided to gather evidence to answer questions generated by themselves or the teacher. They carry out: tests to classify; comparative tests; pattern seeking enquiries; and make observations over time. Children use their observations and testing to compare objects, materials and living things. They sort		The children select from a range of practical resources to gather evidence to answer questions generated by themselves or the teacher. They follow their plan to carry out: observations and tests to classify; comparative and simple fair tests; observations over time; and pattern seeking. Explanatory note		The children select from a range of practical resources to gather evidence to answer their questions. They carry out fair tests, recognising and controlling variables. They decide what observations or measurements to make over time and for how long. They look for patterns and relationships using a suitable sample.	

Abbey Gates Primary School - Science - Working Scientifically progression

			and group these things, identifying their own criteria for sorting. They use simple secondary sources (such as identification sheets) to name living things. They describe the characteristics they used to identify a living thing.		A comparative test is performed by changing a variable that is qualitative e.g. the type of material, shape of the parachute. This leads to a ranked outcome. A fair test is performed by changing a variable that is quantitative e.g. the thickness of the material or the area of the canopy. This leads to establishing a causative relationship.

Recording data Interpreting data	Sort materials	Sort materials	Gathering and recording data to help in answering questions  		Gathering, recording, classifying and presenting data in a variety of ways to help in answering questions Recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables  		Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs  	
	Make comparisons between objects relating to size, length, weight and capacity.	Compare length, weight and capacity.	The children record their observations e.g. using photographs, videos, drawings, labelled diagrams or in writing. They record their measurements e.g. using prepared tables, pictograms, tally charts and block graphs. They classify using simple prepared tables and sorting rings.		The children sometimes decide how to record and present evidence. They record their observation e.g. using photographs, videos, pictures, labelled diagrams or writing. They record their measurements e.g. using tables, tally charts and bar charts (given templates, if required, to which they can add headings). They record classifications e.g. using tables, Venn diagrams, Carroll diagrams. Children are supported to present the same data in different ways in order to help with answering the question.		The children decide how to record and present evidence. They record observations e.g. using annotated photographs, videos, labelled diagrams, observational drawings, labelled scientific diagrams or writing. They record measurements e.g. using tables, tally charts, bar charts, line graphs and scatter graphs. They record classifications e.g. using tables, Venn diagrams, Carroll diagrams and classification keys. Children present the same data in different ways in order to help with answering the question.	
Links and progression in maths - statistics	Create 2 groups of items e.g. heavy, light, tall, short Experiment with their own symbols and marks as well as numerals	Order items by length, weight and capacity	Pictograms Tally charts Venn diagrams (2 criteria) Completing a table of results	Pictograms Tally charts Block diagrams Venn diagrams (3 criteria) Completing a table of results Carroll diagrams	Creating a table of results Bar charts Bar charts Pictograms Create tally charts Understand and use simple scales. Carroll diagrams	Bar charts (various increments) Completing Line graphs Carroll diagrams Classification key Scatter graph	Creating Line graphs Completing two way tables Decide which representation of data is most appropriate Scatter graph	Pie chart Line graph and line of best fit Mean and range of a set of data Scatter graph Bar charts (various increments) Classification key
