## Kids against plastic

We are working hard to reduce the amount of single use plastic in school. We have already completed an audit of problem plastics and will soon be taking part in a workshop all about how we can reduce these in school. In addition to this, Olivia has written a single use plastic policy which we hope to share with you soon. This includes lots of tips for being plastic clever in school and at home.

## Recycling

You can now recycle lots of items at school.

These include:

crisp packets

pens

batteries

ink cartridges

Please send these items into school with your child.

## Marine

To raise awareness of plastic pollution on marine life, we have created a bottle top display in the school hall. We still require blue lids to complete our display - please bring these in if you have any.

## The great British spring clean

A huge thank you to everyone that took part in the great British spring clean. Lots of children and their families completed litter picking in their local area.

## Swap shop

Our swap shop is accessible every day after school and during afternoon play time on Friday.

In addition to books, we will soon be adding uniform. Please save any old uniform that you wish to donate. More details to follow soon.

## Food bank donations

Our next food bank collection will be for The Trussel Trust. Please bring in any donations by Friday 25th May so that we can deliver them over half term. We thank you in advance for supporting this wonderful cause.
